 **BLUE SEAL®**

A close-up photograph of a kitchen appliance, likely a cooktop or oven. It features a dark blue panel with two silver control knobs. The top knob has a small white star icon above it, and the bottom knob has a white play/pause icon below it. The background is blurred.

How do you improve something whose reputation is already grounded in performance and no-nonsense functionality?

You evolve it.

Because there is always a way to do it better.

The Blue Seal Evolution Series is the next stage in a journey of continuous improvement. Sleeker in design, and built to accommodate the demands of today's most passionate chefs, it promises even more performance than anything before it.

evolve

Rethink. Redesign. Rebuild.

The Blue Seal Evolution Series is the culmination of a process in which the Blue Seal range has been completely redesigned. The result is an expanded, more functional range of equipment offering more configuration options and blistering performance. Improved streamlining creates a continuous workspace when units are placed in a line-up, while the 812mm of depth gives plenty of cooking area, even when you are forced to push culinary frontiers from the confines of a small kitchen.

It is truly Evolutionary.

If you can't stand the heat, turn it up.

Every chef could use a little more heat, so a new Advanced Open Burner has been designed to deliver just that – 7kW of power to burn. For optimum performance with all pan sizes, precise controls offer a full range of heat settings within a compact flame.

Evolution. It's not just about good looks.

When your working day is an endless juggle of cooking instruments, you and your wrists will be glad of a flatter, more streamlined surface on which you can effortlessly slide pots and pans from one unit to another.

A heart of steel.

Heavy gauge 304 grade stainless steel is the cladding of choice for all units in the Blue Seal Evolution Series. All ranges are constructed on a full galvanised steel chassis, while fully framed drop down doors are fitted with a heavy-duty hinge system for a lifetime of operation.

Better features and more of them.

Enhanced features across an expanded range of equipment means the Blue Seal Evolution Series can be configured to perform in any situation.

More heat in the moment.

Blue Seal Evolution Series 7kW Advanced Open Burners give you more heat to play with so you can get the big jobs done faster. From high to low heat/simmer, robust control knobs allow you to make subtle adjustments to get the heat setting just right. Made from cast iron for lasting performance, burners have a forged brass cap for consistent flame spread. A non-clogging design ensures optimum burner performance. Flame failure is standard.

A selection of Griddles.

The addition of 450, 600, 900 and 1200mm dedicated Griddles offers new possibilities for customising your Blue Seal Evolution Series line-up. A standard, thermostatically controlled 20mm plate offers excellent heat retention and distribution. The mirrored chrome surface option provides exceptional efficiency by trapping more heat on the cooking surface.

Functional door design.

Drop down doors on all Blue Seal Evolution Series ovens make for easier single-handed operation. Fully framed, they are designed to withstand harsh treatment, while retaining an even seal close.

Would you like a fridge with that?

The Blue Seal Evolution Series' flexibility has made way for you to fit refrigeration units where you need them - so you can do your thing without leaving your station. Match your Cooktop, Griddle, or Target Top with a 900 or 1200mm gastronorm refrigerated base, available in a range of door/drawer combinations. All units accept 1/1 gastronorm sizing. Blue Seal Evolution Series refrigeration units are rated for tropical temperatures up to 40°C and have a holding temperature of -2° to +8°C. A digital temperature control and an automatic defrosting and condensate heater are standard on all units.

More support up top.

Thanks to heavyweight iron castings and a full vitreous enamel finish, Blue Seal Evolution Series Cooktops can take the punishment dished out by chefs on a daily basis. Extended pot support fingers provide added stability for eliminating small pan tip-overs.

Pasta Cooker.

Designed to cope with extreme pasta demand, the Blue Seal Evolution Series Pasta Cooker produces consistently perfect results, really coming into its own when there are multiple orders on the go.

Life's too short to clean.

The Blue Seal Evolution Series has been redesigned to enhance creativity and reduce cleaning time. Rounded internal and external edges make wipe down and hygiene control easier. More streamlined surfaces make for effortless cleaning of an entire cooking line.

Service while you cook.

The Blue Seal Evolution Series has been designed so full service and maintenance can be carried out without removing a unit from the cooking line. The need to shut down a whole line to service one unit is minimised, allowing chefs to keep on cooking!

Our environment.

All Moffat technology is both a product of its environment and a product for the environment. That means that whether the design, development or construction stage every detail is checked to ensure that our equipment is as energy efficient and earthfriendly as possible. We will continue to use every tool at our disposal to work towards reducing environmental impact even further. This way our products can be enjoyed by not just those who use them, but everyone.

A natural selection.

Tops and bottoms. It's your choice.

When it comes to selecting tops and bottoms, the Blue Seal Evolution Series offers a level of choice not seen before. With a bigger range of equipment, you have even more flexibility to configure your kitchen exactly the way you want it.

Gas and Electric Cooktops.

Turn up the heat - Blue Seal Evolution Series Cooktops are about functionality and performance.

Chill where you cook. The inclusion of refrigeration units into the cooking line means raw materials can be safely stored nearby.

If power to burn is what you need, the open top burners on the gas option deliver an impressive 7kW of heat. A more uniform surface created by way of thicker, heavy-duty vitreous enamel trivets with extended finger supports means you can slide smaller pots and pans around the cooktop without fear of tip-over.

Blue Seal Evolution Series Electric Cooktops deliver all the heat you could possibly need through 2.4kW radiant elements or optional 2kW solid plates.

When the job requires a change of cooking surface, both gas and electric options can accommodate 300, 600 or 900mm griddle plates, in smooth or ribbed machine-finished mild steel. Chunky controls allow precise adjustment across the entire heat spectrum, while clear, non-fade markings and strengthened shaft sleeves make regular knob replacement a thing of the past.

Induction Cooktops.

The new Blue Seal Evolution Series range of induction cooktops utilise large 270mm induction zones that automatically detect various sized cooking pans. The cooking zone switches off when the pan is removed.

Each induction model is equipped with either two or four 5kW heavy-duty induction zones that have variable power controls for each cooking zone. The overall construction is a heavy-duty 6mm thick ceramic glass, enabling pans to glide across the cooking surface, combined with signature Blue Seal Evolution welded 1.5mm stainless steel bull nose.

All induction cooktops are supplied with suite matching modular cabinet bases with doors and adjustable feet as standard.

The control design is a large control knob for each induction zone with a (green) indicator light including pan detection indication. Blue Seal Evolution induction cooktops offer the additional benefits of reduced energy consumption and lowering the amount of latent heat in the cooking area.

Standard rear rollers make inline cleaning and servicing even easier.

Oven Ranges.

Whatever the scale of operation, Blue Seal Evolution Series Oven Ranges have a gas or electric option to suit.

Gas options come equipped with our 7kW open cooktop burners, while the electric versions offer a choice of heavy-duty 2.4kW radiant elements, or 2kW solid plates.

Within the oven itself, cast iron sole plates ensure even heat distribution. Heavy-duty motors and circulation fans in the convection ovens reduce cooking times and enable food to be cooked at lower temperatures.

Easy clean, vitreous enamel interior offers 2/1 Gastronorm capacity and generous crown height. Durable cast iron sole plates provide excellent heat retention and recovery.

Target Tops.

As individual units, or with Oven Ranges
in gas or electric.

Blue Seal Evolution Series 900mm Target Tops come as stand-alone hobs, or with a choice of four base units – cabinet base, leg stand, refrigeration base, or oven base (static/convection, gas/electric).

A high output, dual ring cast-iron burner enables the super heavy-duty Target Top castings to deliver outstanding heat control and recovery.

A burner box lined with 50mm refractory ceramic blocks provides excellent thermal efficiency.

Heat is delivered by a 45MJ dual ring, cast iron burner, with single control.

Griddles and Griddle Toaster.

Blue Seal Evolution Series heavy-duty gas Griddles are available in 450, 600, 900 and 1200mm widths, electric Griddles are available in 600, 900 and 1200mm widths. The Griddle Toaster is a must-have addition to any operation requiring the simultaneous production of toasted and grilled food.

Gas Griddle Ranges are available in 900 and 1200mm, with electric ovens (static or convection). Electric Griddle Ranges are available in 900mm, with electric ovens (static or convection).

With solid and seamless weld construction all heavy-duty Griddles have a standard 20mm plate for maximum heat retention and distribution. They are thermostatically controlled for accurate

temperature setting, and are available in smooth or ribbed machine finished mild steel plate.

A mirror chrome surface option, also available as smooth or ribbed, minimises heat loss by trapping more heat on the cooking surface.

The Blue Seal Evolution Series Griddle Toaster features one set of specially designed burners and stainless steel radiants performing two functions – cooking up top and grilling down below – without compromising cooking time or performance.

The burners heat the 16mm thick grill plate above them, while the radiants reflect heat to the toasting rack below.

The 3mm splashguard is a fully welded hob surround providing extra durability and ease of cleaning.

Chargrills.

Powerful burners and radiants are designed to take maximum heat to the edge.

The sheer performance of the Blue Seal Evolution Series Chargrills is delivered through powerful stainless steel burners and radiants that generate maximum heat for sealing in meat flavours.

The grooved fin design and inclined position of the heavy-duty cast iron grates reduces flare by enabling grease to run off into a front collection channel. Drop-on 300 and 450mm griddle sections can also be interchanged with the grates.

The heavy-duty grates are reversible.

Salamanders.

Blue Seal Evolution Series Gas and Electric Salamanders are versatile, easy to use and well equipped with performance features. They can be used for melting, grilling, gratinating and toasting.

Gas models feature energy efficient high-speed infrared burners for fast results. The E91 electric model features powerful 3kW twin coil elements for optimum cooking performance.

Both gas and electric options will accept a Gastronorm GN 1/1 tray. A branding plate is included as standard and is ideal for cooking fish or steak.

Fryers.

Blue Seal has long been recognised for the quality and performance of its Fryers.

The Blue Seal Evolution Series takes this a stage further with a sleeker, more streamlined Fryer range – available in 400mm single pan and 450 or 600mm single or twin pan versions. Gas units feature Blue Seal's unique Vee Ray technology, incorporating patented infrared burners for industry leading frying output and recovery. The new 400mm single pan Fryer gets it's power from a multi-jet target burner.

All Fryers are available with either mechanical or digital controls. Digital control models offer precise temperature control, three product timers, as well as time and temperature digital display. Twin pan models have independent digital controls for each pan and six product timers.

Blue Seal's unique twin pan fryers offer high performance and versatility.

Filtamax Filtration System.

Filtamax is the ideal companion for Blue Seal Evolution Series Fryers because it enhances flavours by removing particles from the oil that would otherwise burn and taint the food.

Filtamax works with premium vegetable oils and shortenings, extending the life of your oil and reducing the costs of replacement. It's easy to use – taking just 10 minutes to drain, filter and refill a 26-litre tank.

Filtamax is out of sight.
When not in use tuck it under your fryer
and close the door!

Bratt Pans.

Designed for convenient high capacity batch cooking, all models offer manual or electric pan tilting for easy portion control.

Big on performance, the Blue Seal Evolution Series of tilting Bratt Pans has been expanded to include 80 litre (900mm wide) and 120 litre (1200mm wide) options in gas or electric.

Easy clean, easy service and superb finishing make the Bratt Pan a welcome addition to any Blue Seal Evolution Series kitchen.

Pasta Cookers.

The Blue Seal Evolution Series Pasta Cooker is built for speed. Fully modular, and featuring a unique pan design, it comes well equipped for the continuous production of perfect pasta.

From variable high boil to standby simmer our patented infrared burner system in gas, or powerful elements in electric, maintains constant water temperature and enables faster turnaround of product through outstanding recovery times from low heat settings.

The standard provision of six baskets allows six different pastas to be cooked at the same time.

Space to create.

New to the Blue Seal Evolution Series - Bench Tops in width sizes to streamline your kitchen - 300mm, 450mm, 600mm and 900mm available with cabinet base, leg stand, refrigerated base or oven (900mm only).

Instruments of mass creation.

The right combination can make a huge difference in cuisine...and when it comes to your kitchen, the right combination will allow you freedom to move and flexibility to grow.

The Blue Seal Evolution Series range of equipment offers a level of choice not seen before - griddles, cooktops, target tops and benches can be combined with ovens, leg stands, fridges or cabinets. With a bigger range of options, you can combine and mix your kitchen exactly the way you want it.
