Catering Water Boilers
where quality matters

Introduction

We offer a wide range of wall-mounted and counter-top water boilers, with unique energy-saving and health and safety features. These range from a 3-litre wall-mounted model ideal for a small staff canteen; to a 22-litre 6kW counter-top model, capable of supplying 487 cups in one hour.

Our latest addition is the stylish Eclipse range with SteriTouch protection, energy-saving features and an easy-service functionality.

All our counter-top models are supplied with a complementary spill tray, and all counter-top and wall-mounted boilers come with a two-year warranty. All boilers incorporate integral scale-inhibitor technology, feature self-diagnostic service indicators, and have cool-to-touch outer casings.

Calomax boilers offer the following advantages:

Safety - high volume models are supplied with Dualflow taps; one fast-flow for filling teapots and urns, the other slow-flow to allow the safe filling of cups and mugs without the risk of splashing. Some models feature a unique key-controlled dispense system that allows you to restrict access to the boiling water.

Energy-saving - our boilers are well insulated and sealed. No steam escapes and radiant heat loss is minimal. New models feature an additional economy function. As they are UK made they add less to your carbon footprint than imported models.

Long life expectancy - at least 5 years if properly maintained, the boilers afford a life-cycle costing that cannot be beaten.

Local service and back-up – immediate response to technical queries and requests for advice. Talk directly to our Service Manager – not a call-centre! We have a nationwide network of Calomax approved Service Partners who can supply local support for on-going maintenance.

Calomax is the only independent specialist manufacturer of catering water boilers in the British Isles, and we are proud to have supplied customers throughout the UK for the last 70 years. Our new range of eco-friendly “Eclipse” boilers continue the Calomax tradition of offering robust, reliable, equipment, at competitive prices.

Product Range

Wall-Mounted Boilers

Eclipse 2W3	3 litre capacity	5
Eclipse 3W5	5 litre capacity	5
Eclipse 3W7.5	7.5 litre capacity	6
Eclipse 3W10	10 litre capacity	6

Wall-mounted Boilers

Wall-mounted Boilers are available in a range of sizes

From the smallest: 3 litres = 18 cups initial draw-off - up to 142 cups in one hour
To the largest: 15 litres = 90 cups initial draw-off - up to 215 cups in one hour

Usually fitted above the kitchen sink / drainer, however wall-mounted drip trays are available to enable them to be installed elsewhere. Wall-mounted boilers can be used to fill just about anything from cups to large airpots and teapots, without taking up valuable counter-top space. Classed as “fixed electrical equipment” they will need to be hard-wired into your supply via a fused-spur, and by a qualified electrician.

Eclipse Range

A range of water boilers that put everyone else's in the shade! Ideal for small applications and where space is limited. This advanced boiler is eco friendly, as you can reduce the capacity by half at times when the use is lighter, thus saving on running costs. With a state of the art design and revolutionary handle which kills all bacteria on contact.

- UK made
- SteriTouch antibacterial protection
- Energy-saving function
- Extended warranty
- Built in scale-inhibitor

Boiling Water

WELLS FARGO BANK
1000 15th St, N
Minneapolis, MN 55403
1-800-368-3688
www.wellsfargo.com

Counter-top Boilers

Counter-top Boilers are available in a range of sizes.

From the smallest: 5 litres = 30 cups initial draw-off - up to 155 cups in one hour

To the largest: 25 litres = 156 cups initial draw-off - up to 681 cups in one hour

Supplied with a 13 amp plug and easily installed by a plumber / handyman; counter-top boilers are supplied with a complementary drip tray and are usually less expensive than the equivalent wall-mounted model.

Because of height and space restrictions in many kitchen areas, it is important you determine in advance which of the many models available will be most suitable for your requirements. Will you be filling cups and mugs, or airpots and urns? Do you need something that will fit under the cupboards? Would a lockable push-button model be more appropriate for your application; for example in Care Homes or Patient-areas in Hospital waiting rooms. Please visit the “perfect boiler” guide on our website homepage to help you decide.

Counter-top Boiler - Installation Guide

To help with planning the installation, a guide can be found in the Support section of our website. By selecting typical options to suit the particular location, a suggested configuration is displayed. Supplementary fittings and accessories are also shown for consideration.

Kudos Range

Counter-top boilers designed for medium to high volume applications where a higher flow rate is required.

The Dualflow versions are supplied with 2 dispensing nozzle, one fast-flow for rapid filling of large teapots and urns; the other slow-flow for the safe filling of cups and mugs.

Styled for front-of-house locations, all Kudos boilers have an attractive two-tone outercasing.

Kudos

Recommended for medium to high volume applications of up to 50 people at any one time.

Kudos Dual-flow

For high volume applications of up to 100 people at any one time.
