

The Bake-King Mini oven

Following the incredible success of the original Bake King oven we've had a lot of requests for an even smaller, more compact version – so here it is, the Bake King Mini.

It's almost identical in every way – just a smaller size and capacity and obviously even better value for money.

With up to 50 total potato capacity – 20/25 in main oven, plus the same quantity in storage/display above the Bake King Mini is the latest in a long line of great value for money convection ovens from King Edward.

100% UK designed & built in our own factory in Herefordshire – it's such exceptional value for money, the only oven to match it is probably it's slightly older, bigger brother!

Both the main oven and storage /display area are illuminated whilst cooking, so this eye catching unit that is sure to be a winner on anyone's counter top. And with such a small 435mm x 455mm footprint, it will be ideal for those foodservice areas looking for high productivity from such a small workspace.

Like all King Edward ovens the Bake-King Mini uses our highly acclaimed convection oven technology to deliver outstanding reliability & efficiency. It's perfect for cooking and holding a wide range of food products such as baked potatoes obviously, but also pastries, pie, and bread products – in fact anything you want to serve hot at front-of-house.

NEW for
2014
